

REBUILD YOUR PFANKUCH MOTORS

When the motor in your equipment begins running poorly, the normal tendency is to send it to a "local" motor shop to be re-built. It makes sense. But it is not "centsable."

The motors used in Pfankuch's "-K" feeders are more advanced than those used in many small machines. When "repaired" by a local motor shop, they often come back performing worse than before. Why? Because they are designed for precision operation and require precision maintenance. When the motor rotor is removed (and it must be to properly clean the interior and inspect all components even if only brushes are to be changed) the critical magnetic field between the rotor and stator is substantially degraded. Torque, power and speed all decline. To compensate for this degraded performance, the operator cranks up the speed of the packaging equipment. This over taxes other components in the equipment such as the power supply and control boards, making matters worse than before and risking related component damage.

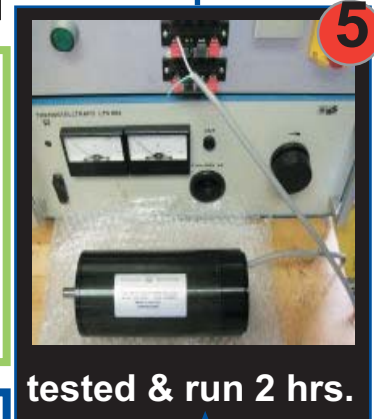

buy a new motor - get the old one rebuilt for free!*

rebuilt to original spec - economically

When you send your motor back to Fusion Concepts, you are assured of it returning to you in proper working order. First of all, we have the knowledge to do the job right. We also have the equipment necessary to re-magnetize your motor to its original specifications. In addition, we only use OEM parts, which are specifically engineered for your motor.

We also make repairing your motor easy & quick. We can even supply you with a secure shipping crate, which you use to send us your motor. We will return your rebuilt motor, usually in just 1 business day. And when it comes back to you, it will run at its original specifications. The typical cost for motor repair is approx. \$300 (\$200 for labor and \$100 for parts) -- a small price to pay for the job being done correctly.

Motor repair by Fusion Concepts. the hassle-free and low cost way to ensure that your packaging equipment keeps running like it did on the day you bought it!

*free labor, you pay only for parts, shipping & handling.
