Please call for Wrapper's wear items

The quickest service call is always one made by your own well trained operators. That's the key to Fusion's Service Philosophy.

Whether its Technical Support regarding our machines, or Customer Support for our supplies and fulfillment, our proactive approach is designed to prevent problems - and respond when necessary.

Our fully staffed Service Department and Spare Parts inventory are available to help with any situation that arises. But integral to every installation is in depth operator, supervisor and maintenance training. We encourage customers to video tape those sessions for reference later.

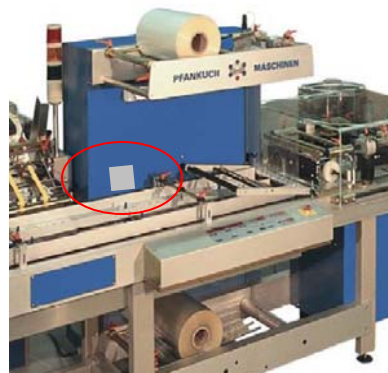

With a small stock of common wear items, and other parts just a day away by DHL, UPS, Fed Ex, our customers experience trouble free operation with minimal downtime.

Fusion maintains detailed "cradle to grave" records regarding your machine. We believe that solving a problem shouldn't involve guesswork.

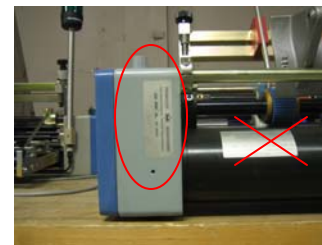

How to locate your machine type and serial number

On Wrappers

You will find the S/N on wrappers on lower left hand side of the front of machine

On Feeders

For old style S/N label
By Nr = S/N

For new style S/N label
By Nr = S/N
